

## 15310 - PVCHECKS-PRO - New Fw v 1.08

### Modifications (vs previous Fw release)

- Improved checks about internal faults

## 15310 - PVCHECKS-PRO - New Fw v 1.07

### Modifications (vs previous Fw release)

- IV Check: Settings and PV module DB are now unlocked even if a recording has been run on SOLAR3
- IV Check: Test results have been split into two pages providing always Voc and ISC @ OPC values
- IV Check and GFL: Extended Nmod range up to 60 modules
- GFL: included position tolerance in Outcome (+/1 module or +/- 3 modules)
- Iso DUAL: improved test reliability in presence of stray capacitance up to 1uF
- RPE: improved noise immunity against external voltages (message : Input voltage > 3V)
